Monday 14 February 2022

K-6 Reading Eggs, Reading Eggspress & Mathletics

We will again offer both online learning platforms at a heavily subsidised price this year. ABC Reading Eggs and ABC Reading Eggspress programs 'designed to get your child motivated and excited about reading in both the school and home environment. Students complete an online placement task that identifies their reading comprehension level so that teacher designed reading group activities and homework is at their level of understanding.'

'Mathletics can provide valuable mathematics learning for students throughout their entire school journey. The program matures as students grow, providing updated visuals, challenges, and activities that continue to challenge and captivate.'

Both providers have offered us a heavily discounted price and the school will, for 2022, also contribute and subsidise the subscription for students. Both programs will cost **\$15.00 for this year.**

These programs will not replace but will support explicit teacher instruction in areas such as reading and mathematics groups, literacy and numeracy tasks and differentiated homework- where students receive instant feedback. They also offer valuable resources that support teachers in meeting students learning needs.

Your child will have access at school and information and logins will be supplied to participating students. We ask families who have existing accounts **not** to link them to their school account so that teachers are able to effectively monitor and set learning goals and expectations for your child.

PLEASE NOTE: **Students will be provided passwords etc once payment is received.**
Students will require a set of head phones / earphones to be able to access the program in literacy and numeracy groups. Please label them with your child's name.

Ruth Leal
Deputy Principal/Instructional Leader
